YEM KARMA REDÜKTÖRLERİ

Hayvan yetiştirmede üretimi artırmak için besleyici yeme ihtiyaç duyulmaktadır. Besleyici yemi oluşturan bileşenleri iyi bir şekilde karıştırmak ve istenilen büyüklükte parçalamak için yem karma makinaları kullanılmaktadır. Kaliteli yem üretimi için verimli karma işlemi önemli bir adımdır.

Yem karma makinalarında, yemin parçalanması ve karıştırılması sırasında, değişken ve ani yüklenmeler oluşmaktadır ve bu yüzden yüksek kuvvetler gerekmektedir. Bu yüksek güç ve dayanımın ihtiyacı, zor şartlarda çalışacak şekilde dizayn edilmiş ve kaliteyi garanti eden üretim süreçlerinden geçmiş aktarma elemanlarının kullanımıyla sağlanabilir.

NRW, yatay ve dikey yem karma makinalarının tüm kapasiteleri için özel olarak dizayn edilmiş, geniş tahlil aralığına sahip modüler planet redüktörler ile ekonomik çözümler sunmaktadır ve tarım endüstrisinde hayvan yemi karıştırıcılarının çalışma gereksinimlerine cevap verebilmek için modifiye edilmiştir.

Bu yüksek verimli yem karma redüktörleri, tasarımının esnekliğinden kaynaklı kullanıcılarla çok çeşitli opsiyonlar sağlamaktadır.

Eş eksenli ve konik seçeneklerin haricinde motorun flans ile direkt olarak redüktöre montaj imkanı sağlanmaktadır.

Isıl işlem görmüş, yüksek yüzey kalitesine sahip, dövme çelik malzemeler ile imal edilmiş, istenilen çıkış oranlarına sahip NRW yem karma redüktörlerinde, standartlara uygun, erkek/dışı alternatifli giriş ve çıkışlar sunulmaktadır.

Yem karma redüktörleri, NRW'nin standart planet redüktör teknolojisinin avantajlarının bileşenidir. Bu redüktörler, ihtiyaçlarınızı karşılayacak şekilde kolayca ayarlanabilir ve çok sayıda yeni fikir ve iyileştirme içerir.

EN

FEEDER MIXER DRIVES

In raising of animals, for the purpose of increasing production, nutritive feed is needed. The feed mixing machines are used for mixing components properly which generate nutritive feed and for breaking them as an intended size. To the quality feed production, efficient mixing process is an important step.

At feed mixing machines, during the breaking and mixing of feed, the variable and sudden overloading are occurred and because of this, high forces are required. This high force and resistance necessity could be provided with the use of connecting elements which are designed to operate at hard working conditions and to have passed from the production processes that guarantee the quality.

NRW would present economic solutions with modular planet gearboxes specifically designed, which has broad ratio for all capacities of both horizontal and vertical feed mixing machines and are modified to meet operating requirements of animal feed mixers at the agriculture industry.

These high-efficient feed mixing gearboxes provide several options to the users because of it's design of flexible base. Apart from coaxial and conical choices, it ensures opportunity to assemble motor directly to the gearbox with the help of flange.

Experiencing heat treating with high surface quality, produced with forged steel elements, own required output rates, at NRW feed mixing gearboxes, suitable to the standards male/female alternative inputs and outputs are offered.

The feed mixing gearboxes are the component of advantages of the NRW's standard Planet Gearbox technology. These gearboxes are easily adjustable to meet your requirements and include numerous idea and improvement.
